

OVERVIEW

PROZYM-Z™ is a professional-strength bio-enzymatic solution designed to tackle organic waste and odor challenges across multiple industries. From pet accidents and sewage backups to livestock housing, composting, drains, and food plants, PROZYM-Z™ goes beyond surface cleaning it digests the underlying organic matter that fuels odors, pests, and microbial growth. Safe, natural, and biodegradable, it is the go-to solution for remediators, property managers, farmers, hospitality professionals, and food processors who need effective odor and waste elimination.

HOW ENZYMES WORK

Enzymes in **PROZYM-ZTM** act as biological catalysts, targeting and breaking down organic compounds at the molecular level:

- **Proteases** attack proteins (urine, feces, blood, food residues).
- Lipases digest fats and oils (grease, manure, organic waste).
- Amylases break down starches and sugars (food soils, crop residues).
- **Ureases/Uricase** neutralize ammonia and uric acid (urine and pet odors).
- Oxidoreductases help suppress embedded organic stains and odor molecules.

The result is **rapid digestion of waste and true odor elimination** without fragrances, masking agents, or harsh chemicals.

'MOST ENZYMATIC PRODUCTS CONTAIN FROM 3-6 ENZYME TYPES, NOT PROZYM. X=15, Z=25!'

SOILS BROKEN DOWN BY PROZYM-ZTM

- Urine, feces, manure & vomit
 Food residues, starches & sugars
 Fats, oils & grease
 Ammonia and uric acid odors
- Mold, mildew & microbial films

MARKETS & APPLICATIONS

Mold & Odor Remediators

Restores smoke- and water-damaged properties. Eliminates embedded organic residues in porous surfaces.

• Property Management & Restoration

Apartments, rentals, and commercial spaces.

Safe elimination of pet odors, urine, and sewage backups.

Hospitality & Facility

Hotels, casinos, gyms, schools, daycares, and senior care centers.

Odor control in public restrooms, locker rooms, and high-traffic spaces.

• Farms & Agriculture

Reduces ammonia and organic waste odors in stalls, pens, and poultry houses. Speeds composting and improves soil/turf quality.

Clarifies ponds, lagoons, and irrigation water.

Food & Beverage Processing

Keeps drains clear, controls fruit flies and eliminates organic buildup.

Effective on rinse equipment and embedded soils in concrete and grout.

PACKAGING & DISPENSING

PROZYM-ZTM is available in a 64oz bottle with a built-in 2oz dispensing cup for accurate measurement. It can be applied with secondary spray bottles, pump-up sprayers, or foaming applicators, depending on the environment.

Putting an End to Organic Waste & Odor

APPLICATION	DWELL TIME	DIRECTIONS	OZ/GAL
Remediation Cleaning & Deodorizing	Spray & dry	Daily cleaning; light soils and odors	2
Urine, Feces, Heavy Odors & Stains	10+ min	Apply liberally; agitate if needed; rinse/extract	1–3
Floor Drains (initial treatment)	5 days	Mix 2 oz per gallon warm water; pour daily for 5 days	2
Floor Drains (maintenance)	Weekly	Mix 2 oz per gallon warm water; pour weekly	2
Residential Septic (≤1,000 gal system)	Ongoing	Mix 4 oz per gallon; add weekly	4
Commercial Septic (per 1,000 gal capacity)	Ongoing	Mix 8 oz per 5 gallons; add weekly during low flow	8/5 gal
Drain Field Opener (150 sq ft area)	Ongoing	Mix 20 oz per 10 gallons; spray until soil saturated	20/10 gal

Disposal: Always recover soiled solution where possible. Pour into drains with traps or compost systems. Launder reusabl cloths after use.

KEY BENEFITS

- Ends odors at the source by digesting organic matter.
- Broad-spectrum waste elimination urine, feces, food waste, grease, ammonia.
- Safe & sustainable biodegradable, non-toxic, non-corrosive.
 Long-term microbial control prevents regrowth by removing food sources.
 Versatile application equally effective in property, farm, facility, and food plant settings.
